Subject: Clean-Up Complete

U.S. Scrap

12300 S. Cottage Grove Ave/12301 S. King Drive, Chicago, IL

Latitude: 41.67 Longitude: -87.6036

POLREP No.:

Site #:

**Reporting Period:** 5/31/2008 - 6/13/2008 **D.O.** #:

0092

Start Date:

1/23/2008

Response Authority: CERCLA

Mob Date:

1/23/2008

**Response Type:** 

**Incident Category:** 

Time-Critical Non NPL

Completion Date: 6/13/2008 **CERCLIS ID #:** 

**NPL Status:** 

Removal Action

RCRIS ID#:

ILD980679484

Contract #

68-S5-03-06

**Site Description** 

See POLREP #1

### **Current Activities**

For the period of May 31 through June 13, 2008, EPA, the ERRS contractor, Environmental Quality Management, and the START contractor, STNJV, continued site activities.

To date, 380 tons of low-level PCB special waste were loaded and transported off-site to Newton County Landfill located in Brook, IN for disposal.

ERRS disposed of all the RCRA empty containers at the Newton County Landfill.

During the final weeks of the project, 40 tons of solid material were transported off-site for disposal. To date, 612 tons of TSCA-regulated PCB solid waste excavated from the trench and lagoon were loaded and transported off-site to Wayne Disposal Landfill in Belleville, MI.

To date Approximately 18,600 gallons of waste liquids from the lagoon area were shipped off to the Clean Harbors Deer Park LP in LaPorte, Texas for disposal. An additional 5,200 gallons of waste liquids were shipped off to the Clean Harbors facility in Grantsville, Utah.

START completed the air monitoring of work zones and 11 perimeter monitoring locations with a Mulitrae. START conducted dust monitoring during the transfer of clay backfill to the site.

To date approximately 435,000 gallons of treated non-hazardous water have been transported off-site for additional treatment and disposal by Century Environmental Resources in Alsip, Illinois.

ERRS received 30 mil geofabric on June 4th, 2008 and clay backfill material was placed on top of the geofabric on June 5th and 6th, 2008. The geofabric and clay backfill were installed to reduce infiltraion and off-site migration around the sheet pile wall. After the geofabric and clay were installed additional elevation surveying was conducted to again ensure that surface water would flow to the southern portion of the site. A total of approximately 4,000 cubic yards of clay was used for the elevation and recontouring of the area.

Site security was completed. All equipment was demobilized from the site on June 13, 2008.

#### **Planned Removal Actions**

No further action is planned at this time

#### **Next Steps**

Refer site to State of Illinois and U.S. EPA Remedial program for further evaluation.

#### **Key Issues**

None

#### Estimated Costs \*

	Budgeted	Total To Date	Remaining	% Remaining
Extramural Costs				
ERRS - Cleanup Contractor	\$1,500,000.00	\$1,219,644.52	\$280,355.48	18.69%
RST/START	\$127,800.00	\$110,620.00	\$17,180.00	13.44%
Intramural Costs		<u> </u>		

grand the second				
<b>Total Site Costs</b>	\$1,627,800.00	\$1,330,264.52	\$297,535.48	18.28%
· ·	, ,	,		

<sup>\*</sup> The above accounting of expenditures is an estimate based on figures known to the OSC at the time this report was written. The OSC does not necessarily receive specific figures on final payments made to any contractor(s). Other financial data which the OSC must rely upon may not be entirely up-to-date. The cost accounting provided in this report does not necessarily represent an exact monetary figure which the government may include in any claim for cost recovery.
